3P Biopharmaceuticals among the 500 fastest growing companies in Spain

This is the first year that the company appears in the ranking established by CEPYME.

Noáin, Spain, December 19, 2022, 3P Biopharmaceuticals (3P), a leading contract development and manufacturing organization (CDMO) specializing in the process development and cGMP manufacturing of biological products is now one of the 11 companies from Navarra that appear in the ranking of the 500 companies that lead business growth in Spain according to the ranking established by CEPYME.

The CEPYME500 ranking is based on the evaluation of a set of indicators that measure the growth, solvency, innovation potential and international projection of these companies. The main function of this initiative is to give national and international recognition and projection to the companies that have been selected, thus improving their growth potential and visibility.

To select the 500 most relevant companies in the Spanish economy, financial variables and indicators of innovation and international expansion have been combined. This exhaustive analysis has been possible thanks to the collaboration of Informa D&B, the leader in business and business information, which manages a database with highly qualified commercial and financial information.

The biotechnology company located in Noáin has 350 employees and has a turnover projection for this year that confirms the continuous annual growth. Since its beginnings in 2007, the company has already added 60 clients, almost all of which are international and located in 20 countries.

With respect to its facilities, the company has a global investment plan of 45 million euros, which began in 2020 and will continue until 2025.

Dámaso Molero, CEO of 3P Biopharmaceuticals states: " We could not have finished this year better. We are very proud to receive this recognition from Cepyme. The history of 3P has been like climbing mountains and the mountain always surprises you. It is the same with biotechnology. Our achievements and our growth in these 15 years have been achieved thanks to the great work done every day by the professionals who make up 3P".

For 3P Biopharmaceuticals, this recognition complements the one it received last September from Actualidad Económica, in which it was selected as one of the 100 best companies to work for in Spain.

About 3P Biopharmaceuticals

3P Biopharmaceuticals is a market-leading CDMO (Contract Development and Manufacturing Organization) specializing in process development and GMP (Good Manufacturing Practice) manufacturing of biologics and cell therapy products. 3P offers solutions for all stages related to new drug and biosimilar development and manufacturing including cell line and process development, analytical methods development, pre-clinical and clinical supply and commercial manufacturing.
